Boxer® Equipment Introduces 120 Dedicated Trencher

New Model Debuted at GIE+EXPO

Winn, Mich. (November 6, 2014) – Morbark, Inc., the manufacturer of the Boxer® Equipment line of compact utility loaders, has introduced a new model to its line: the Boxer 120 Dedicated Trencher. The 120 Trencher made its trade show debut at the GIE+EXPO in Louisville, Ky., from Oct. 22-24.

The Boxer 120 Trencher, completely restyled and redesigned from the previous 118 model, takes gasoline-powered compact trenching equipment to the next level, boasting up to 740 ft-lbs (1003 N·m) of torque output for ample power in the toughest digging conditions.

“We’re excited to add this model to our offerings,” said Jason Showers, Boxer Product Manager. “The Boxer 120 Trencher features many class-leading characteristics not found on competitive units. In a world of walk-behind trenchers, the 120 Trencher is the only unit designed as a ride-on unit, allowing better visibility to the trencher assembly and the job being completed.”

The 120 Trencher is also the only unit in its class to feature a spring-loaded trencher boom and standard crumber assembly. The spring-loaded boom helps retain even chain tension and allows for roots, rocks and debris traveling around the end roller, and is designed to compress, removing much of the stress to the head shaft and reducing chain wear. The adjustable crumber assembly keeps loose dirt in the trench close to the chain for a cleaner finished trench. Another key feature is the ergonomically designed operators control station with all controls accessible for two-hand operation.

About Morbark:
Morbark, Inc., based in Winn, Mich., has been innovating and manufacturing durable, high-performance equipment for the forestry, recycling, tree care, sawmill and biomass markets for more than 50 years. Morbark equipment helps customers harvest, process and convert wood and other organic waste materials
into valuable, useful and profitable products. The company produces a full line of whole tree and waste wood chippers, flails, brush chippers, horizontal and tub grinders, sawmill equipment, material handling systems and more. Visit www.morbark.com, “Like” us on Facebook, follow us on Twitter (@morbark) or subscribe to our YouTube channel.

About Boxer Equipment:
Boxer Equipment has three model series available: the 100 series dedicated trencher and the 300 and 500 series compact utility loaders, built to handle a full complement of more than 50 universal attachments. The Boxer’s standard quick-attach system enables the user to quickly and easily switch from a bucket to forks to auger or other tools for optimum on-the-job flexibility and bottom line performance. A feature unique to the Boxer 500 series is its variable-width, rubber track undercarriage, which allows the units to enter through gates as narrow as three feet wide.
