

Job Specification: Hydraulic Systems Engineer

JOB DESCRIPTION SUMMARY

Morbark's Hydraulic Systems Engineer works as part of Morbark's Systems Engineering team, ensuring that machine hydraulic systems meet or exceed applicable standards and requirements for the target customers and markets. The Hydraulic System Engineer will work with the other Systems Engineers and various Product Engineers to develop and validate new and modified Hydraulic Systems on current production machines, equipment under development, and any custom-built equipment that requires custom hydraulic controls. The Hydraulic Systems Engineer, as part of the Product Engineering Teams, will ensure that the Hydraulic Systems on all new and modified products meet any and all requirements and standards.

REQUIREMENTS

EDUCATION

- Bachelor's degree, preferably in Mechanical Engineering

EXPERIENCE

- 1 – 3 years of Hydraulic Engineering-related experience
- Project management experience, interfacing with multiple projects
- Prior experience in Hydraulic System design and routing
- Experience working with SolidEdge software package is highly preferred

SKILLS

- Demonstrated ability to identify applicable design requirements for a given application or product
- Ability to work with a diverse group of employees and customers
- Good communication, interpersonal, and teamwork skills
- Effectively establish, understand, and communicate with individuals at multiple levels of the organization, including shop floor and office
- Formal Problem Solving training/skills
- Good working knowledge of Microsoft product suite
- Qualification to work in the United States

PERSONAL

- Demonstrated ability to lead courageously, maintaining a strong position amidst opposition to resolve important issues, and ability to navigate through complexity
- Ability to interact with all levels of the organization
- Business agility to manage complexity, change, and uncertainty; flexibility; nimbleness
- Hands-on, energetic, and a "can do" attitude
- Honest, reliable, and ethical nature

JOB SPECIFICATION: Electrical Systems Engineer

DUTIES AND RESPONSIBILITIES

- Own the Hydraulic System design and ensure that Morbark hydraulics comply with regulations and standards as well as meeting or exceeding requirements as specified by our various customers
- Recommend and make improvements to current Hydraulic Systems
- Collaborate with colleagues in the design process; collaborate with other departments to provide a “best in class” quality product
- Identify Hydraulic System-related training opportunities and help develop training needed to improve the overall organization’s development
- Create reports for management outlining current project status or current issues
- Maintain a record of system changes as required
- Contribute to systems-related troubleshooting and problem solving
- Identify cost-saving opportunities for the product or office
- Support other groups and departments as needed

COMPANY OVERVIEW

Morbark, LLC, based in Winn, Mich., has been innovating and manufacturing durable, high-performance equipment for more than 60 years. Morbark’s family of companies and equipment helps customers to process and convert waste wood and other organic materials into sellable end products. The Company and its affiliate brands, Rayco, DENIS CIMAF, and Boxer Equipment, produce a full line of brush chippers, stump cutters, mini skid steers, forestry mulchers, aerial trimmers, whole tree, and biomass chippers, flails, horizontal and tub grinders, sawmill equipment, material handling systems, and mulcher head attachments for excavators, backhoes, and skid steers. Sales and aftermarket support are conducted through a worldwide, authorized dealer network. For more information, please visit www.morbark.com
