FOR IMMEDIATE RELEASE

Morbark[®] Introduces Beaver[™] M15RX Brush Chipper *New Model Debuts at TCI Expo*

Winn, Mich. (Nov. 14, 2013) – Morbark, Inc., introduces a new brush chipper to its Beaver line of Tree Care Products. With its high capacity and lighter-weight design, this compact chipper is the ideal unit for residential tree services, utility line clearing, vegetation management, maintenance contractors and municipalities.

“Our popular Beaver M15R brush chipper includes more standard features than any other chipper in its class,” said Casey Gross, Morbark’s Tree Care Products Sales Manager. “Not every customer needs all of those features. The M15RX gives our customers the option of a smaller and more affordable chipper that retains the M15R’s 15" capacity and high productivity.”

Like all Morbark models, this aggressive unit is engineered to give customers the power and features they need to maximize output and enhance profitability. The Beaver M15RX incorporates many of Morbark’s most popular features, including:

- A patented chambered air impeller system to increase chip throwing velocity and reduce dust and material blowback out the infeed to pack more into the chip truck.

- The powerful TorqMax™ top feed wheel compression system, which generates more than 3,400 lb./ft. of material pulling force.
- 8.2 lb., 6" channel frame rails with 2" x 4" tubular steel frame with cross bracing for increased structural strength while maintaining low unit weight.

The Morbark Beaver M15RX will be on display for the first time at the TCI Expo, hosted by the Tree Care Industry Association, in Charlotte, N.C., November 14-16, 2013, where Morbark will provide a first-hand look at the industry's most advanced brush chippers and stump grinders. For more information on the TCI Expo, visit www.expo2013.tcia.org.

If you would like more information about the Morbark Beaver M15RX, or any of the Morbark products, please call 1-800-831-0042 or visit www.morbark.com.

About Morbark:

Morbark, Inc., based in Winn, Mich., builds equipment that creates opportunities in the forestry, recycling, sawmill, bio-energy and tree care markets. Innovating and manufacturing durable, high-performance equipment for more than 50 years, Morbark offers a full line of whole tree and waste wood chippers, flails, brush chippers, horizontal and tub grinders, sawmill equipment, material handling systems and more. Morbark equipment helps customers harvest, process and convert wood and organic waste materials into valuable, useful and environmentally sound products.
