**FOR IMMEDIATE RELEASE**

## **Morbark® Debuts Track Chipper, Tree Care Product Updates at TCI Expo**

WINN, MICH. – November 10, 2016 – Morbark, LLC, will debut the Beaver™ M18R Track Tree and Brush Chipper, as well as improvements to its Tree Care Products lines, at the TCI Expo today at the Baltimore Convention Center. Morbark is a leading manufacturer of equipment used in forestry, recycling, tree care, landscaping, sawmill and biomass markets.

“We first saw the need for a tracked version of our 18" capacity chipper for fire and pest cleanup efforts going on in the western United States,” said Casey Gross, Morbark Director of Tree Care Products. “The M18R Track gives customers the higher horsepower they need while remaining compact to maintain maneuverability through a variety of conditions.”

The Beaver M18R Track adds 400mm rubber tracks, with 4.84 PSI ground pressure and low-speed and high-speed travel ranges of 1.0 MPH and 1.8 MPH, to its popular M18R chipper.

The chipper can be seen at Morbark’s booth (#1613) at the TCI Expo in Baltimore today through Saturday.

Morbark is committed to continuous improvement of our equipment. Such enhancements can be seen in the standardization of the product line, with increased use of robotic welding processes, and more gasoline engine options, as well as Tier 4 diesel engines.

Attendees will also notice something new with our Boxer line of compact utility loaders: Boxer will now be Morbark orange. An updated logo, decals and paint color will provide greater synergies between the models in the complete family of Morbark equipment. Boxer mini-skid steers also will feature new joystick controls for smoother operation and improved operator experience. The Boxer operator will be able to drive the unit with one hand and access all functionality without releasing the joystick controls.

### **About Morbark, LLC**

Morbark, LLC, based in Winn, Mich., has been innovating and manufacturing durable, high-performance equipment for forestry, recycling, tree care, landscape, sawmill and biomass markets for nearly 60 years. Morbark equipment helps customers harvest, process and convert wood and other organic waste materials into valuable, useful and profitable products. The Company produces a full line of whole tree and waste wood chippers, flails, brush chippers, horizontal and tub grinders, compact utility loaders, sawmill equipment, material handling systems and more.
